Technical details

The LINDY Wireless Extender for HDMI extends Full HD 1080p signals up to 30m*, without compression or latency, just as if you were using a cable!

Using a MIMO 5GHz radio the WHDI Wireless Extender provides full support for HD 1080p, HDCP, multi channel audio and IR remote control and can easily be used with our range of HDMI Switchers, Splitters and Matrix Switches. Installation is simple, just plug and play, no configuration, tuning or adjustment is required.

Purchase additional Wireless Extender for HDMI sets to view content from multiple sources in different rooms around your house (1:1 viewing only). Add full Matrix capabilities to your extender by using it in conjunction with our [4x2 Matrix](#). Specially designed for use with the Wireless Extender this matrix allows you to connect up to 4 HDMI devices to two screens or projectors, with any combination of inputs and outputs.
